Subject: Additional Background Contaminants

Hi Kristine -

In Rick Albright's March 24 decision on the RI Section 7 background dispute he directed the LWG to calculate background values for "the other 23 contaminants by use of the methodology EPA employed..." According to Jim and based on his discussions with you, it appears that Rick was referring to the 18 contaminants presented in Appendix D to RI Section 5. Here's the list of the 18 contaminants that are included in Appendix D. Please confirm that this is the list of contaminants that the LWG is directed to calculate background values for per Rick's direction. Once we have your confirmation, Integral will calculate background statistics for these contaminants using EPA's methodology and submit them to EPA by April 24, 2015. Thanks, Gene
